

Oral/Poster Presentation for HEMCE-2017

Instruction to the Authors for Poster

Organizing committee for HEMCE-2017 desires to get all the posters printed locally at Pune, to maintain uniformity in poster presentations and to manage poster presentations sessions, effectively. In light of this, following instructions are forwarded to respective authors in connection with the poster presentations.

1. Each paper selected for poster presentation will be presented using one poster of size 100 cm height and 70 cm wide.
2. Authors are requested to submit posters in the mentioned size in ready to print condition Power Point /Corel Draw.
3. All posters will be printed in vertical mode.
4. Poster to include title of the paper (36 point, bold, only first letter of each word capital) in 1 inch printed size at the top of the poster.
5. Name (30 points, bold, only first letter capital for each word) and affiliation (30 points, italics, only first letter capital for each word) of the authors/presenters should follow the title of the paper.
6. The texts in the poster must be readable from minimum 4 feet (120cm) distance.
7. The smallest text in the poster should be 9 mm (3/8") high in print.
8. The text should be concise enough to be read within 7 minutes.
9. Photo, diagram and graphs should be used to attract attention and should be visible from minimum 4 ft distance.
10. Flow of the content of the poster should be from TOP LEFT to BOTTOM RIGHT corner.
11. The poster should be made with dark text on light background for good visibility in day time.
12. The texts should not be in all capital letters format. It should be in running text format and all sub-titles must have first letter capital of the word.
13. In writing texts, use of italics in place of underline is preferred.
14. In main text, use of paragraphs must be avoided and bulleted text is always preferred for better readability.
15. The poster should be self explanatory for quick assimilation of content and conclusion by the viewers.

All poster presenters are requested to forward soft copy of their presentation in the above format to Email (hemce2017@gmail.com) latest by 27th Oct' 2017, positively. Organisers will not be able to print the presentation material received after 27th Oct' 2017 and the responsibility lies with the presenters to bring the printed material for display.

Instruction to the Authors for Oral Papers

All oral presenters are requested to make presentation material in power point. Tentatively 12-15 mins time is allotted for presentation and 3-5 mins for interaction.

ORAL PAPERS FOR HEMCE-2017

Paper No.	Paper Serial No.	Topic	Estt. /Org
3.4	3	Studies on Effect of non-metallic Fuel on Multispectral Infrared Flare Composition	HEMRL
7.5	8	Studies on Burning Rate of 19-Perf Gun Propellants from Closed Vessel Evaluations	HEMRL
5.2	12	Prospects of Nozzle-less Boosters for Efficient Space Propulsion	SRM Univ
11.7	19	Extension of Shelf Life of Electrically Initiated PAD for Operating Rocket Wrench Mechanism and Water Jet Disruptor System for Ammunition Disposal based on Experimental Evaluation	ARDE
3.5	20	Experimental Evaluation of Twin Detonator Electro Explosive Device for Initiating Fire Extinguisher System of Airborne Vehicle	ARDE
11.3	21	Physics of Water-Jet Impingement using Propellant Actuated Cartridge for Improvised Explosive Devices	ARDE
2.4	23	Screening of Boron-Based Solid Fuels for Hybrid Rocket Applications	IIT Kh
5.15	28	Experimental Investigation of Confined Jet Flow Behaviour	SRM Univ
5.3	31	Energetic Composite Solid Propellants for Advanced Space Propulsion	SRM Univ
5.4	32	Study on Improvement of Regression Rate and Combustion Efficiency in Hybrid Rocket Motor Using Multi-Protrusion	BITS Ranchi
10.2	34	ISROSENE-Aluminum Gel propellants - Synthesis and Rheological Characterization	VSSC
5.1	35	Improvement in Performance of Solid Rocket Motor by Modifying Grain Configuration	RCI
7.4	36	Nitrogen Rich Compounds: An Approach to Reduce Gun Barrel Erosion	HEMRL
10.1	42	Pressure Induced Changes in TEX Studied by X-ray Diffraction and Raman Spectroscopy: Implications on Explosive Properties	IGCAR
2.6	44	3D Numerical Investigation of Hydrogen Combustion in a SCRAMJET to Enhance Combustion Efficiency	BITS Ranchi
3.3	46	Qualification of Ignition Initiation System for Large Solid Rocket Motor	ASL
5.7	47	Design Optimization of Star Grain for Solid Propellant Rocket Motor	CHESS
5.8	52	Development of High Burning Rate Composite Propellant for Nozzleless Booster Application with Enhanced Strain Capability	HEMRL
5.11	56	Development of Nano-Aluminium Based Composite Propellants by Tailoring Diol-Triol Content and [-NCO]:[-OH] Ratios	SFC Jagdalpur

5.9	57	Investigating the Effect of Injector Type on the Regression Rate of the Hybrid Rocket	BITS Ranchi
9.2	59	Development of Surface Enhanced Raman Spectroscopic Substrates for Detection of Explosives	IISc
13.5	61	Surface Coating over Fine and Ultrafine Ammonium Perchlorate	VSSC
1.2	70	Synthesis and Characterization of Propyl Nitroguanidine (PrNQ): An Insensitive Energetic Material for Melt-Cast Formulation	HEMRL
1.5	71	Studies on Compatibility & Storage Stability of Cyanuric Triazide (CTA): A Lead-Free Primary Explosive	HEMRL
11.5	72	Toxicity Evaluation of UltraFine HMX on Triticum sp., Human Skin (HaCat) and Lung Cells (L-132)	SPPU
8.2	74	Structural, Elastic and Electronic Properties of Crystalline Bis (nitrofurazano) Furazan (BNFF-1) using Van der Waals Density Functional Approach	ACRHEM
5.6	75	Effect of Binder Melt Flow on the Leading Edge Flames of Solid Propellant Sandwiches	ACRHEM
7.3	76	Performance Evaluation of Base Bleed Motors for Artillery Projectile under Dynamic Conditions: an Innovative Approach	PXE
10.9	82	Laser Doppler Velocimetry Technique for Determining Instantaneous Burning Rate and Response Function of Solid Propellants under Fluctuating Pressures	ITM
1.4	83	Preparation of Low Aromatic and Ultra-Low Sulphur Jet Fuel for Air-Breathing Engine Applications	CPCL Chennai
4.1	85	Aluminium Hydride Synthesis by Electrochemical Route	ARCI
9.1	86	Standoff Detection and Classification of Explosive Molecules Using Femtosecond LIBS	ACRHEM
4.11	97	Synthesis of energetic oxidizer bis(2,2,2-trinitroethyl)amine (BTNA) and theoretical performance evaluation as a propellant ingredient	ACRHEM
12.4	99	Synthesis and Characterization of Al-Mg Eutectic Nanoalloy Particles by Electrical Wire Explosion Process	IITM
8.1	100	Application of the Methodology "Counterflow Diffusion Flames" in Modeling of the Terminal Ballistic Processes of Munitions Based on Reactionary Material	RUSSIA
12.2	101	Fabrication of Nano/Micro-Explosive Particles in Liquid Media using Femtosecond Ablation Technique	ACRHEM
11.6	104	Ammunition Dismantling System with customizable Caliber / Geometry for various ammunitions	HEMRL
10.8	106	Shadowgraphy Imaging of Laser Induced Shockwaves in Transparent Media	ACRHEM
10.3	107	Amphiphilic Polymer Modified Graphene Surfactant: Effect on Thermal Stability and Mechanical Properties of Carboxylated Nitrile Latex Nanocomposites	IICT

8.3	108	Numerical Simulation of Laser Induced Shock Waves from Aluminum film in Presence of Helium Gas at Different Ambient Pressures	ACRHEM
4.2	109	Real Time Analysis of Crystallization Process Dynamics of NTO using FBRM & PVM	HEMRL
13.3	110	Studies of Parametric Optimization and Reaction kinetics of precursors of DNDA-57, an Energetic Plasticiser	HEMRL
11.4	116	Modelling of Safety System and Comparison of Safety Systems between Government and Private Organizations	VSSC
3.6	124	Development of MEMS Pyrotechnic Thruster for Micro Propulsion Applications	VSSC
8.4	125	Pressure Estimation for Pyrotechnic Devices Using Energy Based Mathematical Model	VSSC
10.10	126	Optimization of Interface Properties of Composite Propellant with NBR Insulator based on the Studies on Liner Thickness and Casting Time	ACEM
6.3	127	Effect of Particle Size of Aluminium on Pressable Plastic Bonded Explosives	HEMRL
8.5	130	Quantum-Chemical Studies on 7H-[1,2,4]Triazolo[4,3-b][1,2,4]Triazole Containing Energetic Salts	NITK
8.8	131	DFT Studies for Rate Constant Computation of Aromatics and Heterocycles Nitration in Mixed Acid Environment for High Energy Materials Synthesis	HEMRL
13.4	132	Reaction and Reactor Engineering of Bachmann Process for RDX Production	HEMRL
4.12	133	Studies on Friction Insensitivity Improvement of Tetranitroacetimidic Acid	HEMRL
11.2	140	Investigation of Suitability of Chemical and Electro-Chemical Treatment Methods for Destruction of Perchlorate in Solid Propellant Hog-Out Effluent	SFC Jagdalpur
10.11	144	Assessment of Mechanical Properties of Aged Composite Propellant by Indentation Method	HEMRL
4.4	145	Preparation of Energetic Composite Material Containing Boron Aluminium Ligature (BAL) and FOX-7	HEMRL
4.3	146	Single-Step Catalytic Conversion of Isopentane into Isoprene	IIP Dehradun
13.6	151	Studies on Effect of Screw Geometry and Operating Conditions on Residence Time Distribution in a Twin Screw Continuous Mixer	HEMRL
10.4	152	Studies on Effect of Propellant Formulation on Pseudo-plasticity, Thixotropicity and Yield Stress	HEMRL
3.2	155	Application of Ultrafine e-CL-20 Explosive in Slapper Detonator	TBRL
7.2	159	Effect of Dinitrodiaza Alkane as Energetic Plasticizer for Extruded Double Base Propellant Formulations	HEMRL
12.3	168	Cotton Assisted Hydrothermal Synthesis of Nano Copper Oxide : Promising Catalyst for Ammonium Perchlorate Thermal Decomposition	VSSC

8.6	169	Computational Studies on Combustion Instability of Solid Rocket Motor: A Case Study	IITM
6.4	176	Use of Pyral Powder to Increase the Yield of Explosives	IITM
4.10	179	Effect of solvent polarity and temperature on recrystallised ammonium perchlorate	VSSC
11.1	181	Development of Construction Materials for Explosive Storage Buildings	CFEES
8.9	182	Understanding the Sensitivity of Explosive Crystals: A Computational Approach	HEMRL
8.7	185	HEM Screener: A Chemoinformatics Tool for Design and Development of Novel High Energy Materials Using Virtual Screening	NCL
9.4	187	Identification of Explosives using Standoff LIBS Combined with Multivariate Analysis	ACRHEM
2.7	190	Frequency time analysis of pressure time profile of solid rocket motors having combustion instability	HEMRL
10.5	191	Propellant Burning Wave Studies by Embedded Thermocouple and Imaging Method at Ambient Pressure	HEMRL
7.1	192	Active Propulsion of an Artillery Gun Shell by Means of A RAMJET	IITM
5.5	196	Performance study of Aluminum Based Water Ramjets	IITM
13.1	197	Boron Aluminum Ligature (BAL) Obtained using DC Thermal Plasma Route and Their Thermal Properties	SPPU
10.7	199	Optimization of Regression Rate of Solid Fuel Grain in Hybrid Rocket Motor by Vortex Generation	PCOE
5.12	202	Failure Analysis of the Propulsion System for Antitank Guided Missile (ATGM)	HEMRL
9.3	204	Temperature Dependent Terahertz Spectroscopy of Aqueous Soluble and Insoluble Explosives	ACRHEM
4.13	208	Optical Absorption in Metal Nanoparticle Doped High Energy Material Composites	ACRHEM
9.5	213	Design and Development of Automated Gun Propellant Metrology System	HEMRL
6.5	214	Studies on Detonation Reliability of High Explosive Booster for a Specific Application	VSSC
4.6	218	Synthesis and Characterization of Energetic Polyphosphazene	HEMRL
3.1	219	Development of a PETN Based SDT Detonator Using ZPP as an Initiating Charge	VSSC
10.12	222	False Positive Indications in the Digital Radiograph of Warhead due to Scattering of X-rays	HEMRL
13.2	225	Particle Size Reduction of b-HMX by Nozzle Assisted Spraying	TBRL
11.8	234	Microbial Remediation –A Potential Green Technology for Treatment of Energetic Chemicals Present In Wastewater and Soil	CFEES

11.9	238	Innovative Design of Multi-compartment Propellant Storage Building	CFEES
8.12	242	Role of Thermal Conductivity in Determining Temperature Sensitivity	IITM
5.13	252	Production Oriented Sleeve Cast Inhibition Technique for Cartridge Loaded Composite Propellants	HEMRL
12.5	255	Synthesis of High Surface Area Copper Oxide Nano Flower and its Application as Burning Rate Modifier in Composite Propellant Formulation	HEMRL
8.10	257	Experimental and Numerical Studies on Initiation Behavior of Thin Explosive Sheets on Impact of Shaped Charge Jet	HEMRL
4.7	259	Synthesis and Characterization of BPTAP: As Alternative Heat Resistant Explosive	HEMRL
4.8	269	Nitro-Functionalized-Hydroxyl Terminated Polybutadiene: A Potential Energetic Polymer for Composite Propellant	HEMRL
6.2	272	Evaluation of Layered Fuel Rich Explosive Charges for Thermobaric Applications	HEMRL
1.6	273	A patent review on Green Materials in HEMs / Munitions	CSIR-URDIP
1.3	275	Studies on Effect of RDX Quality on the Shock Sensitivity of Polymer Bonded Explosive Formulations	HEMRL
10.6	276	3D X-Ray Computed Tomography (3D-CT): Inspection Technique for Comprehensive NDE of Explosive Systems	HEMRL
5.14	279	Design of Ignition System for Nozzle Less Booster (NLB) Motor	HEMRL
6.1	280	2,4,6- Triamino-1,3,5-Trinitrobenzene Based Explosive Formulations Containing Vinylidene Fluoride-Chlorotrifluoroethylene Copolymers Matrices with Different Molecular Weight	TBRL
2.5	281	Gaseous Hydrocarbon Combustion Studies in High Pressure Rocket Combustors	IITK
2.3	282	Investigation of Reverse Flow Slinger Combustor	IITK
8.11	283	Explosively Driven Hyper Velocity Launcher	TBRL
4.9	287	Effect of Relative Humidity on Flow Properties of Dry Coated Fine and Ultrafine Ammonium Perchlorate Powder	ACEM
4.5	293	Microwave Assisted Synthesis of Glycidylazide Polymers-Triol (GAP-Triol) Using Polyepichlorohydrin-Triol (PECH-Triol) as an Energetic Polymer	NMU Jalgaon
12.1	299	Preparation and Characterization of Nano HNS	TBRL
2.1	303	Research on Solid Propellant Burning Process in Low Temperature Gas Generator	RUSSIA
1.1	304	Sublimation and Thermal Decomposition Kinetics of 1,1-Diamino-2,2-Dinitroethene (FOX-7)	RUSSIA
5.10	306	Self-Organized Micro-Scale Oscillatory Systems of the Reactionary Zones and Concept of the Smart Solid	RUSSIA

		Micro-Propulsion System	
2.2	307	Artificial Neural Networks Models of Energetic Materials Combustion	RUSSIA
4.14	309	Spectral Properties of Energetic Materials and their Heating by the Near-IR Laser	RUSSIA

POSTER PAPERS FOR HEMCE-2017			
Paper No.	Paper Serial No.	Topic	Estt. /Org
P11.1	1	Risk Assessment of RF Hazards in Test Range	ITR,Balasore
P3.1	2	Effect of Binders on Burning Rate of Slow Burning Tungsten Based Pyrotechnic Delay Composition	HEMRL
P3.2	4	Effect of Particle Size of Magnesium on Performance of Magnesium / Teflon / Viton (MTV) Flare Composition	HEMRL
P10.1	5	Thermal Studies on Gun Powder with Low Combustion Residue	HEMRL
P8.1	7	Simulation of Free-Field Incident Blast Over-Pressure Curves at Intermediate Scale Distances	HEMRL
P 2.1	10	Final Stratified Premixed Combustion in Gas Turbine Engines	SRM Univ
P5.1	11	Comparison of Performance Parameters for Different Bore Configurations	SRM Univ
P6.1	14	Studies on Dispersion Pattern of Incendiary Cinders	HEMRL
P3.3	18	Studies on Effect of Epoxy Binder on Sensitivity of Red Phosphorus based Smoke Compositions	HEMRL
P11.2	22	Design and Testing of Electro Explosive Devices for Water-Jet Disruptor Application	ARDE
P5.2	25	Platonisation of Nitramine Based Extruded Double Base Propellant	HEMRL
P5.3	26	Accelerated Temperature Ageing Studies on High Burn Rate Extruded Double Base Propellant	HEMRL
P10.2	27	Thermal Degradation Behaviour and Effect on Thermal Properties of Charring Ablators	ASL
P 2.2	29	Effect of Particle Size on Droplet Regression, Break-up and Combustion Characteristics of Boron-Laden Jet Fuel Droplet	IIT Kh
P8.2	37	Finite Element Modelling of Heat Transfer and Cure analysis in Polymer Composites	VSSC
P8.3	38	Numerical Modelling of Seasonal Climate Temperature Influence on The Performance of Solid Rocket Motor	VSSC

P6.2	39	High Explosive Based Single Fragment Launcher at Hypervelocity	ARDE
P10.3	40	Identification of TNSTAD (trans- 1,4,5,8 - tetranitrosotetraaza decalin) as a Substitute for Picrite in Unknown Triple Base Gun Propellant	HEMRL
P8.4	41	Electronic properties and Hirshfeld surface analysis of Dihydroxylammonium 5,5'-bistetrazole-1,1'-diolate under pressure	ACRHEM
P8.5	43	Theoretical Predictions of Novel N-nitramines for their use as High Energy Materials	DIAT
P5.4	49	A Study on Grind ability of Revised AP Feed Fraction to Achieve Specified AP fine Particle Size Distribution and Ballistic properties of Agni Motor	SDSC
P12.1	50	Energetic Nano-composite as a Coating Material for Desensitization of High Energy Materials	HEMRL
P4.1	51	Development of HTPB based Polymer Clay Nanocomposite as a New Binder System for Composite Propellant	HEMRL
P8.6	58	A Theoretical Study on Improved Energetics of nano-Aluminized Composite Propellants with GAP based AP/ADN Formulations for Rheological Feasibility	SFC Jagdalpur
P4.2	62	Synthesis, Spectral Analysis of some 5-nitro-1-aryl/alkyl-tetrazoles	ANNAMALAI Univ
P4.3	63	Synthesis and Characterization of Aluminium Hydride	ANNAMALAI Univ
P4.4	64	Synthesis and Characterization of α -Nitrolactone: Monomer for Energetic Binder	ANNAMALAI Univ
P4.5	66	Synthesis and Characterization of Isowurzitane and Tetrazole Crafted HTPB	ANNAMALAI Univ
P11.3	67	Safety challenges in handling raw materials for solid propellant production	VSSC
P12.2	68	Nano Aluminium - Synthesis, Characterization and Ballistics Study	VSSC
P10.4	73	Model-Free Approach on the Thermal Decomposition Kinetics of an Energetic Ionic Liquid: 1-Methyl-4-Amino-1,2,4-Triazolium Nitrate	VSSC
P5.5	77	Instantaneous Burning Rate Measurement of Plateau and Non-Plateau Propellant Using Ultrasound Technique	IITM
P5.6	78	Combined Effect of Paraffin and Microcrystalline Wax on Mechanical Properties and Regression Rate of the Hybrid Rocket Fuels	BITS Ranchi
P9.1	79	Centrifuge Testing: An Indispensable Quality Control Tool to Examine and Improve Interface and Structural Integrity of Large Size HEM based System for Ensuring High System Reliability	SFC Jagdalpur
P5.7	81	Measurement of Pressure Coupled Combustion Response of a novel Composite Solid Propellant by Pulsed T-Burner Method	RIC Chennai

P5.8	84	Formulation Studies and Performance Verification of a new Pyrotechnic Igniter Composition for Ballistic Evaluation Motor (BEM)	VSSC
P4.6	88	Identification and Quantification of Unknown Two Component Liquid Explosive	HEMRL
P12.3	89	Ag-Au Bi-metallic Nanoparticles and Nanostructures Fabricated by Femtosecond Laser Ablation for Detection of 2- 4 Dinitrotolune	ACRHEM
P8.7	90	Study on the Effect of Gap Between the Ballistic Evaluation Motor and Assembly Chamber on Propellant Burning Rate Prediction	SDSC
P12.4	91	Synthesis and Characterization of Sb ₂ S ₃ Nanoparticles for Pyrotechnic Delay	DIAT
P8.8	92	Different Methods for Simulating High Altitude Testing of Rocket Motors	ACEM
P8.9	93	Correlation of Sub-Scale Rocket Motor Burn Rate with Strand Burn Rate for Different Burn Rate Compositions	ACEM
P10.5	95	Monitoring of Degradation of Methylene Blue Dye by MEMS Technology	HEMRL
P12.5	96	Catalytic Decomposition of Ammonium Dinitramide –Water Liquid Propellant by Free Standing CuO Nanoparticles	ACRHEM
P10.6	98	Thermal Decomposition Kinetics of a Potential Oxidizer Tetranitroacetimidic Acid (TNAAC)	ACRHEM
P4.7	102	Quantification of 4-(1- hydroxymethyl)-2,2-Dimethyl-1,3-Dioxalane (C3) and 4-(2- Hydroxyethyl)-2,2-Dimethyl-1,3-Dioxalane (C4) by Gas Chromatography	HEMRL
P5.9	103	Studies on TKX- 50: Preparation of Different Particle Size and its Effect on Ballistic Properties in HTPB/AP/Al based Composite Propellant Formulation	HEMRL
P10.7	105	Interface Bond Strength Evaluation System for Combustible Cartridge Case (CCC) based Tank Ammunition	HEMRL
P13.1	111	Process Development for preparation of Fine Ammonium Perchlorate by Recrystallization in a Batch Mode	HEMRL
P13.2	112	Development of Continuous Methodology for Preparation of Fine AP, an Oxidizer for Propellant Formulations	HEMRL
P13.3	113	Process Development and Scale-Up of Reduced Sensitivity-RDX	HEMRL
P13.4	114	Process Optimization for preparation of N,N'-Dinitro- N, N' – Dimethyloxamide	HEMRL
P11.4	115	Study of Sound Level in Crew Area for Large Caliber Artillery Gun fitted with Double Baffle Muzzle Brake	ARDE
P11.5	117	Analytical Study of Safety through Differential Equations	VSSC
P11.6	118	Removal of Perchlorate from Water Using Iron Doped Activated Carbon - Sustainable Adsorbent	VSSC

P10.8	119	Activation Energy and Kinetics of Oxidation of Amorphous Boron Powder and Aluminium Dodecaboride	HEMRL
P10.9	120	Oxidation and Kinetic analysis of Aluminium Diboride	HEMRL
P11.7	122	On the Feasibility of Jetfans for Aircraft Fire Safety	SRM Univ
P10.10	123	Linear Charge Off-Set Studies on RDX Based Flexible Linear Shaped Charge (FLSC) by Using NDT Techniques (X-Ray & NR)	VSSC
P10.11	128	Quantification of Curing Agent in HTPB-TDI Base Liner Composition used in Case Bonded Composite Propellants	HEMRL
P6.3	129	Comparative Studies on Tungsten & Aluminium loaded Pressable Plastic Bonded Explosives	HEMRL
P5.10	134	Quantification of Binder Melt in Composite Solid Propellants	IITM
P5.11	135	Thermal, Ballistic and Rheo-Mechanical Characterization of High Burn Rate Composite Solid Propellant for Crew Escape System	VSSC
P5.12	136	Studies on Effect of Boron – Aluminium Ligature (ALB ₁₂) on the performance of Boron – Potassium Nitrate Igniter Composition	HEMRL
P6.4	138	Challenges to build Multiple Scarfed Nozzle Jettisoning Motor for Crew Escape System	VSSC
P13.5	139	Analysis of ABP Process Effluent and Design of Treatment Plant	HEMRL
P6.5	141	Experimental Comparative Study of Ground Burst and Stand-Off Burst during Measurement of Blast Pressure Parameters of Explosives	HEMRL
P6.6	142	Experimentation and Analysis for Estimating Explosives Fireball Parameters using Scaled Weight Method	HEMRL
P10.12	147	Studies on Effect of Particle Size of Ammonium Perchlorate on Impact, Friction and Spark Sensitivities	HEMRL
P8.10	148	Modelling of Size Reduction Operation of Ammonium Perchlorate in Hammer Mill	HEMRL
P5.13	150	Studies on Development of Potassium Perchlorate based High Energy Extruded Double Base Propellant	HEMRL
P13.6	153	Design of Slurry Distributor and Cone for Casting of Propellant Slurry for Complex Rocket Motor	HEMRL
P8.11	154	Exploring the Compatibility of Energetic Plasticizer DNDA-5 with Energetic Binders: Thermal and DFT Study	HEMRL
P4.8	156	Preparation, Characterization and Threshold Initiation Studies of Ultrafine RDX	TBRL
P6.7	157	Studies on Fluoro polymer Based Plastic Bonded Explosive Compositions	HEMRL
P10.13	158	Accelerated Ageing of Solid Propellants: A New Approach	IITM
P4.9	160	Synthesis and Curing Behaviour of Non-Isocyanate Binder: Poly (Allyl Azide)	HEMRL

P4.10	161	Compatibility Study on Poly (Allyl Azide) vis-a-vis Explosive / Propellant Compositions	HEMRL
P10.14	163	Evaluation of Thermal Stability of Composite Propellants with Varying Coarse to Fine Ammonium Perchlorate Ratio and Catalyst Concentration	VSSC
P8.12	164	Model for Determination of Detonation Properties of C-H-N-O Based Halogenated Polymer Bonded Explosives	TBRL
P4.11	166	Novel Spectrophotometric Method for Determination of Hexavalent Chromium in Composite Solid Propellants	VSSC
P11.8	167	Disposal of Unserviceable Ammunitions of Different Hazard Divisions (HD) using Innovative Methods	TBRL
P11.9	171	Studies on Removal of Peroxide in Effluent from HTPB Plant	VSSC
P6.8	172	Vibration Casting of Highly Viscous Composition of HMX: TNT	TBRL
P3.4	173	Development of a Pyro-based Isolation System for High Altitude Engine Tests	VSSC
P7.1	174	Study on DEGDN Based High Performance Gun Propellant for Tank Gun Ammunition	HEMRL
P5.14	175	Optimization of Solid Loading for Processing of Nitrate Ester Plasticized Polyester Polyol based Advanced Energetic Solid Rocket Propellants	HEMRL
P13.7	177	Design of Nozzle for Spray Atomization Process for Recrystallization of Ultrafine Explosives	TBRL
P5.15	178	Studies on Burn Rate Modification of Advanced Energetic Solid Propellants	HEMRL
P7.2	180	Development and Evaluation of High Energy Nitramine Based Gun Propellant Composition	HEMRL
P8.13	183	A QSPR Based Method for the Prediction of Heat of Combustion of Diverse Higher Energy Materials Using Partial Least Square Regression and Genetic Programming	NCL
P8.14	184	MD Simulation Studies on HTPB-b-GAP Copolymers	HEMRL
P4.12	186	Synthesis of Nitro Substituted 1, 2, 4-Triazole, Imidazole and AlkylNitramine Derivatives: A New Class of Energetic Materials	HEMRL
P8.15	188	Prediction of Electrostatic Spark Sensitivity of Energetic Molecules ($C_aH_bN_cO_d$) by Artificial Neural Network	HEMRL
P9.2	193	Quality Control Tools for Linear Explosive Cords	VSSC
P6.9	195	Studies on Surface Coating of HMX with TNT and Polymer Binder	TBRL
P5.16	198	Validation of Burn Rate Law for Composite Igniter Propellant at Higher Pressures	VSSC
P6.10	200	Process Optimization of Isostatically Pressed PBX Based Shaped Charge Using Taguchi Approach	TBRL

P10.15	201	Compatibility Study of Octahydro- L, 3, 5, 7-Tetranitro- 1, 3, 5, 7-Tetrazocine with Energetic Materials and Inert Polymeric Materials	TBRL
P11.10	203	Assessment of Environmental Parameters of NHN Effluent and its Disposal	HEMRL
P8.16	205	Lattice Dynamics and Thermodynamic Response of Cubic Alkaline-Earth Metal Nitrates $M(NO_3)_2$ (M= Sr, Ba): A First Principle Study	ACRHEM
P9.3	206	Quality Assurance of Military Explosives : An Overview	CQA(ME)
P10.16	207	Kinetic Evaluation of Zirconium/Potassium perchlorate (ZPP) as Primary Charge of ISRO Standard Initiator	VSSC
P10.17	210	Designing of a Corrugated Acoustic Spectrum Analyzer for Characterization of Laser Induced Shock Waves from Solid Graphite	ACRHEM
P4.13	211	A Rheological Method to Measure the Degree of Exfoliation of PU/Clay Nanocomposite	HEMRL
P5.17	212	Study of Bonding Agent cum Surfactant on Composite Propellant	HEMRL
P10.18	215	Radiography of Planar Defects in Gas Generator (GG) Grains	HEMRL
P5.18	216	Determination of Long Term Strain Endurance Capability of HTPB Based Solid Propellant	VSSC
P4.14	217	Rapid determination of Boron content in Amorphous Boron Powder (ABP) using Atomic Spectrometry	HEMRL
P8.17	220	Investigation of Dual Bridgewire Detonating Cartridge Anomaly through Numerical Analysis	VSSC
P3.5	223	Ignition and Thermal Behavior of Al/MoO ₃ Thermite for LASER Ignition Application	HEMRL
P10.19	224	Study of Radiographic Image Quality Achieved on Film for an Explosive Charge Using 7 MeV X-Rays	TBRL
P11.11	226	Recycling Hazardous Waste of Combustible Cartridge Case High Energy Materials into Crop Fertilizer by the Process of Alkaline Hydrolysis	DIAT
P10.20	227	Study on Shelf Life and Ageing Characteristic of Pedcoat Liner used in Processing of Large Size Solid Rocket Motor	SFC Jagdalpur
P11.12	230	Hazards of TNT Exudation and Preventive Measures	CFEES
P11.13	231	Issues and Challenges of Demilitarisation of Ammunition in India	CFEES
P11.14	232	Static Electricity : Hazards in Explosive Environment and Remedial Measures	CFEES
P8.18	233	Correlation for Propagation of Blast Waves in Tunnel	CFEES
P10.21	236	Study on Factors Affecting Propellant –Rubber Peel Strength in Processing of Large size Solid Rocket Motors	SFC Jagdalpur
P6.11	237	Underground Explosion and Propagation of Ground Shock	CFEES

P11.15	239	Sacrificial Protective Wall for Impulsively Loaded structure	CFEES
P10.22	240	Study Effect of Aging and Temperature on Creep Deformation of Epoxy Resin, Applying Method of Accelerated Aging	SFC Jagdalpur
P12.6	241	Zero Valent Iron Loaded Silica Nanoparticles for the Removal of TNT, DNT, HMX and RDX	CFEES
P13.8	243	Synergetic Approach towards Utilization of Effluent of TATB Pilot Plant for Effective Leaching of Crude Amorphous Boron Powder	HEMRL
P4.15	244	Study on Quantitative Analysis of Copper Chromite in Composite Propellant Using Inductively Coupled Plasma-Optical Emission Spectroscopy-An Instrumental Method	SFC Jagdalpur
P4.16	245	Synthesis and Characterization of Polyglycidyl Ethers: An Isocyanate Free Curative	HEMRL
P11.16	246	Studies on Conversion of Waste Fuel Rich Based Propellants into Liquid Fertilizer and its Effect on Plant Growth	HEMRL
P5.19	247	Hydroxyl Terminated Polybutadiene Based Machinable Polyurethane Inhibition System for Solid Rocket Propellant	HEMRL
P8.19	248	Design and construction of Radial Hole Drilling fixture for HELINA Nitramine Extruded Double Base Propellant	HEMRL
P4.17	249	Unique Liner Formulation for processing of case Bonded Rocket Motors	HEMRL
P10.23	250	Studies on effect of Nano Clay in Inhibitor Formulation for Inhibition of Gas Generator Propellants	HEMRL
P4.18	251	Development of Bonding Promoters for Silicone Based Insulation with HD1.1 Class of Propellant	HEMRL
P8.20	253	A Simplified Mathematical Model for Predicting Performance of Low Explosive Charges	VSSC
P11.17	254	Significance of Operational Hazards in Propellant Manufacturing	CFEES
P10.24	256	Studies on Evaluation of Ferric Citrate in HTPB/AP/Al Composite Propellant Formulations	HEMRL
P8.21	258	Design and Development of Delay Module for Triggering Combustion Instability	HEMRL
P10.25	261	Image Processing Tools and Algorithms for Assisted Defect Recognition (ADR) in Digital Radiograph of Propellant Grains	HEMRL
P5.20	262	Studies on the Effect of Ammonium Perchlorate (AP) Particle Size on the Mullins Effect Phenomena in Composite Propellants	ACEM
P10.26	263	Experimental and Flory a-Model Based Characterization of PBPU Elastomer in Composite Propellant Applications and Fitting of Molecularly Derived Rubber Elasticity Models	ACEM
P10.27	264	Challenges in Solid Rocket Motor Radiography	HEMRL

P8.22	265	Atomistic Molecular Dynamics Simulations of Hydroxy Terminated Polybutadiene (HTPB) on Aluminium Surface	ACEM
P8.23	267	CFD Analysis of High Pressure and Temperature Gases in Multi Propellant Grain Rocket Motor	HEMRL
P5.21	268	Effect of Propellant Burn Rate on Performance of an Artillery Rocket	ARDE
P4.19	270	Analysis of Variability of Instrumental Determination of Composite Propellant Properties	ACEM
P10.28	271	Study on Optimization of Catalyst Concentration to Reduce Curing Time of Inhibition Resin	ACEM
P3.6	274	Studies on Thermal Behavior of LFCN/KClO ₄ /Viton Pyrotechnic System	HEMRL
P6.12	277	Blast Pressure Attenuation in Woollen Felt	TBRL
P5.22	284	Feasibility Study of Indigenous Amorphous Boron Powder (ABP) of purity 91-93% in igniter composition	HEMRL
P5.23	285	Design of Ignition System for Booster motor of Pilotless Target Aircraft (PTA)	HEMRL
P5.24	286	Analysis of Factors Affecting Web Thickness of Ballistic Evaluation Motor	ACEM
P4.20	288	Rapid and selective Analysis of High Energy Propellant Ingredients by Reverse Phase HPLC method	HEMRL
P8.24	289	Prediction of Detonation Velocity of Polymer Bonded Explosives by Using Empirical Approaches	HEMRL
P6.13	290	Effect of Tungsten Content on Metal Acceleration Properties of Polymer Bonded Explosive Formulations	HEMRL
P6.14	291	Study of effect of blast wave generator parameters on blast wave strength	TBRL
P8.25	292	Assessment of Performance of Various Polymers in HMX and TATB Based Polymer Bonded Explosives (PBXs) for its Long Term Storage Applications	TBRL
P4.21	294	Synthesis and Characterization of Poly(Allylazide-Tetrazole) (PAAT) As An Energetic Polymer	NMU Jalgaon
P5.25	295	Propellant - Inhibition Interface Bonding - HTPB Based Composite Propellant	ASL
P6.15	296	Interaction of a Shock Tube Generated Blast Wave with Solid Obstacles	CSIR-CMERI
P10.29	297	Enhancement in Burn Rates of Composite Propellant Using High Surface Area Pyral Al: An Approach for Achieving Higher Shelf Life	SFC Jagdalpur
P10.30	298	Development of Viscoelastic Stress Analysis Capability for Structural Integrity Assessment of Solid Propellant Grains	VSSC
P6.16	300	Effect of Fluoro and Silicone Based Polymeric Binder on Impact and Friction Sensitivity of High Explosives	TBRL
P10.31	301	Study on Accelerated Ageing of HMX, Viton and their PBX by Vacuum Stability Thermal Testing	TBRL

P 1.1	305	Experimental Investigation of Slow Cook-Off for IM Compliance	TBRL
P4.22	308	Synthesis, characterization and performance study of inorganic high energy nanocomposites materials	OFB Bolangir
